DETAILED ACTION

1. It is noted that the preliminary amendment filed 12-18/01 added new claims 33-41. These claims have been renumbered 18-25 respectively, pursuant to 37 CFR 1.126.

Election/Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 18-21, drawn to method of detecting ICAM-4 , classified in class 435, subclass 7.1.
 - II. Claims 22-25, drawn to monoclonal antibodies/hybridomas, classified in class 530, subclass 287.1.
3. The inventions are distinct, each from the other because of the following reasons:
4. Inventions II and I are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the antibodies may be used in a method of treating disease by administration of the antibodies to a subject.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, as shown by their different classification, restriction for examination purposes as indicated is proper.
6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1645

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
